

30. (NEW) An orally disintegrable tablet comprising:

fine granules containing lansoprazole,

said granules having a core and at least one layer coating said core;

a sugar; and

a low-substituted hydroxypropylcellulose having 5 to 7 % by weight of hydroxypropoxyl groups;

wherein said tablet is improved in chalky taste and has no roughness.

31. (NEW) The tablet of claim 30 wherein said fine granules are enteric-coated fine granules.

32. (NEW) An orally disintegrable tablet comprising:

fine granules containing lansoprazole,

said granules having a core and at least one layer coating said core;

a sugar; and

a low-substituted hydroxypropylcellulose having 5 to 7 % by weight of hydroxypropoxyl groups;

wherein said low-substituted hydroxypropyl cellulose is separate from said fine granules in said tablet;

wherein said tablet is improved in chalky taste and has no roughness.
